

NAVI-TRAC® LITE PAVILION

STRENGTH • VERSATILITY • HIGHER RETURN ON INVESTMENT

NAVI-TRAC LITE PAVILION BY ANCHOR – UNIVERSAL APPLICATIONS

The Pavilion is uniquely designed to stand alone as an intimate party enclosure or connect to an existing Navi-Trac structure to extend climate-controlled space. As a stand-alone unit it is perfect for small backyard parties on decks or poolside patios, restaurants, country clubs, and other commercial applications requiring temporary to semi-permanent shelter from the sun and inclement weather. The Navi-Trac Lite Pavilion is expandable in 10' widths with projections extending in 2' increments from 12' to 24'.

“If you rent Navi-Trac Lite you will also rent the Pavilion. I’d say about two-thirds of the Navi-Tracs we rent also have a Pavilion, and we have a fair share of renters who just use the Pavilion by itself. Most of those are sidewalk cafés and upscale backyard and country club parties.”

HOW IT'S MADE MATTERS

NAVI-TRAC LITE PAVILION FEATURES & BENEFITS:

- Easily attaches to building with mounting brackets
- Modular design – unlimited lengths
- Faster installations with fabric installed through track system
- Strong, channeled box beam framing provides maximum stability
- Uses Navi-Trac 2-piece sliding walls or standard tent walls
- Tensioned, kedered fabric creates a taut appearance and allows water to run off
- Wall bars and keepers secure the sidewalls to the frame, reducing the chance for wind or water to enter

NAVI-TRAC LITE PAVILION ACCESSORIES & OPTIONS:

- Smooth or gathered liners
- Hanging brackets for lights and decorations
- Cathedral window, French window, clear, mesh, or solid sidewalls
- Navi-Trac jacks and wheeled panel guides for smooth installation
